

# WHAT'S stem GOT TO DO WITH IT?

Advanced, high-speed fiber optics connect 11 buildings on the Nebraska State Fairgrounds—creating 16 separate high-tech networks providing all the Fair's voice, data and video needs. There is free wireless Internet access for fairgoers and exhibitors, and many days there will be over 3,000 users connected to the network. These networks are linked to 20 video screens across the grounds to provide scheduling updates, weather and other notices. In partnership with NET, the Fair will be streaming 5 different video feeds to the Internet.

**Technology—  
connecting all  
aspects of your  
Nebraska State  
Fair experience**
