

Nature Suncatchers

Materials:

flowers, dandelions, leaves, small twigs, plants, weeds, any small pieces of nature
paper plate
glue or glue sticks
wax paper
string or ribbon
scissors

1. Head outside for a nature walk and collect bits and pieces of nature for your suncatcher! This can be dandelions, flowers, grass, small twigs, weeds, leaves.
2. Color the outside of the paper plate to make your suncatcher extra colorful!
3. Take a paper plate and cut a whole in the center (see picture).
4. Cut out two circles of wax paper. Cut the wax paper in half and cut the circles at the same time—make sure the wax paper circles are larger than the hole in the center of the plate.
5. Glue one side of the wax paper onto the back side of the plate.
6. Arrange your nature items on the wax paper that is stuck to your plate. Glue the items on once you like your arrangement.
7. After you have glued your nature items to the wax paper, place the other wax paper on top of the items and glue it to the front side of the paper plate. Now the nature items will be inside the two pieces of wax paper.
8. Cut a small hole at the top of the plate to put the ribbon through
9. Hang your nature catcher in the window!
