

WHAT'S  
stem  
GOT TO DO WITH IT?

Reaching speeds of over 50mph, the Pronghorn is the fastest land mammal in North America. So how do you go about counting all the Pronghorns in Nebraska? Biologists with the Nebraska Game & Parks Commission use small aircraft to fly over large herds. Using these aerial counts, biologists can then accurately estimate the total number of Pronghorn in the state. Based on these numbers, hunting permits are set to maintain a sustainable population of these beautiful animals.

**Biology—supporting sustainable habitats.**
